DETAILED ACTION

1. Applicant's amendment received July 17, 2003 is acknowledged and entered. Claims 12-25 are pending.

2. Newly submitted claims 16-17 and 25 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 16-17 are drawn to non-elected sequences that have different amino acids and lengths than the elected sequences. Claim 25 is drawn to a method of removing HIV viruses, previously not presented. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 15, 16 and 25 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Drawings

3. The drawings submitted January 11, 2001 are accepted by the Examiner. Previously, the drawings were objected to in the Office Action dated January 13, 2003. Since the instant application was filed on or after November 29, 2000, the drawings were considered acceptable for a published application and therefore do not require further modifications.

Claim Objections

4. Claims 18-24 are objected to because of the following informalities:

The claims depend from withdrawn claims 16 and 17. Appropriate correction is required.

Application/Control Number: 09/757,655

Art Unit: 1648

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 12-15 and 18-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are drawn to a peptides consisting of various sequences which are, unless otherwise indicated, products of nature. Suggested language is "[A]n isolated peptide".

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 15 is rejected under 35 U.S.C. 102(e) as being anticipated by Bult *et al* (6,503,729). Claim 15 is drawn to a peptide having affinity to gp120 comprising the amino acid sequence of DVKAG (Asp-Val-Lys-Ala-Gly) SEQ ID No: 1. Bult discloses a polynucleotide sequence that encodes a polypeptide comprising the peptide sequence DVKAG. The sequence listing reference in columns 77 and 78 is available for viewing from the USPTO web site http://seqdata.uspto.gov.sequence.html?DocID-6503729B1. Although Bult fails to disclose the

Application/Control Number: 09/757,655 Page 4

Art Unit: 1648

functional activity of a peptide having affinity to gp120, the peptide sequence is the same as that being claimed. Therefore, Bult anticipates claim 15.

Conclusion

7. No claim is allowed. The amino acid sequences in claims 12-14 are free of the prior art.

This Office Action contains new grounds of rejection and is therefore non-final.

Papers relating to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 located in Crystal Mall 1. The Fax number for Art Unit 1648 is (703) 308-4426. All Group 1600 Fax machines will be available to receive transmissions 24 hrs/day, 7 days/wk. Please note that the faxing of such papers must conform with the Notice published in the Official Gazette, 1096 OG 30, (November 15, 1989).

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Stacy B. Chen, whose telephone number is (703) 308-2361. The Examiner can normally be reached on Monday through Friday from 7:30 AM-4:00 PM, (EST). If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's Supervisor, James C. Housel, can be reached at (703) 308-4027. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
